ASSA ABLOY Entrance Systems

Do small components slow your business down?

Your entrances deserve expert service from your local service team

A steady flow of people, goods and services through your entrances every day is a sign of a healthy business.

But heavy traffic also puts your doors under pressure. Every little component is working overtime to keep them running and issues are more likely to occur.

And what happens if your doors stop working?

- Customers have to go elsewhere
- Production stands still
- Revenue is lost

All because those doors have been working hard, opening and closing, day in and day out.

Even something as robust and well-engineered as an ASSA ABLOY automatic door needs service to stay in great working order. That is why we offer the industry's most complete, flexible service solutions.

With local presence and operations in your country, ASSA ABLOY Entrance Systems have specialized service technicians on call to help you take care of your service needs, so you can focus on business.

What would happen if your doors did not open for business?

2587 packages are shipped through this door every week
